

GLIA TOURNIQUET QUALITY ASSURANCE CHART

1. End without buckle must be rounded, and sewn closed with no frayed edge.
2. Box stitch (square with an 'x') must be 30mm from the rounded end.
3. Stitching down both sides of the strap, and holding the Hook and Loop pieces together, must not have any gaps or openings.
4. Clip must be on the strap with the caps pointing toward the windlass.
5. The inner strap must move freely, and not be pinched by rivets or stitches.
6. Rivets must be totally secure under pressure, with no wiggle.
7. Windlass must be located between the rivets and the bridge of the backplate.
8. Slack on inner strap must be 25mm.
9. Distance from bridge of backplate to stitching at buckle must be 35mm.
10. Both inner and outer straps must be sewn through the slot on the buckle that has no teeth.
